(S) user is able to validate pipeline listing
page when there is no pipeline created

(F) Creation and Field level validation of
pipelines

The screenshot displays the 'Data Integration Layer' web application. The top navigation bar is pink and contains the company logo, the tagline 'LIFE IS FOR SHARING.', the application name 'Data Integration Layer', and a 'Logout' link. Below this, a secondary navigation bar shows 'Projects', 'Connections', and 'Support' tabs. The main content area is for a project named '5ANupAutoDIL07-30'. It features a sub-header 'Pipelines' and a message stating 'There is no pipelines in this project. Go to Builder to create one.' To the right of this message are three tabs: 'Overview' (which is active), 'Builder', and 'Team'. On the far right, a sidebar provides details about the project, including its title, description ('ProjectForAutomation'), tags, project engine ('Spark'), and project actions. A 'Test run' button is located at the bottom of the sidebar.
